INDEX ALPHABETICUS

FUNGORUM ITALICORUM AUTOGRAPHICE DELINEATORUM

NUMERI TABULAS INDICANT

A

Acremonium

alternatum Link. 714.
atrum Corda. 713.

Aerostalagmus

albus Pr. 1194.

Acrothecium

atrum (Pr.) Sacc. 5.
bulbosum Sacc. 6.
(Acrotheca) caulium Sacc. 9.
obovatum Cooke. 766.
pauciseptatum (Pr.) Sacc. 7.
pumilum Sacc. 5.
(Dactylaria) purpurellum Sacc. 8.
(Acrotheca) Solani Sacc. 7.
tenebrosum (Pr.) Sacc. 6.

Actinonema

Rosae (Lib.) Fr. 1474.

Agaricus

Citri Inz. 1121.
Hesperidum Brig. 1122.

Aglaospora

profusa (Fr.) De Not. 736. #4

Alternaria

Brassicæ (Berk.) Sacc. 736.
— f. Citri Penz. 1205
tenuis Nees. 737.

Amblyosporium

umbellatum Harz. 708.

Amphisphaeria

conica (Lév.) C. et D. 447.
culmicola Sacc. 444.
ericeti S. et S. 321.
foeda De Not. 445.
Hesperidum Penz. 1148.
melanommoides Speg. 624.
papillata (Schum.) De Not. 446.
Passerinii S. et S. 623.
pseudoumbrina Sacc. 443.
Spegazziniana Sacc. 135.
umbrina (Fr.) De Not. 442.

Antennaria

elaephila Mont. 1137.

Anthostoma

alpigenum Fuck. (Sacc.) 161.
decipiens (DC.) Nits. 167.
gastrinum Fr. Sacc.
— forma Ulmi campestris 169. A.
— forma Carpini Betuli 169. B.
— forma Rhamni cathartici 170. A.
— forma Quercus pedunculatae 170. B.

italicum S. et S. 165.
Schmidtii (Auersw.) Nits. 163.
*Anth. melanotes 164.
taeniosporum Sacc. 171.
turgidum (Pers.) Nits. 168.
uroporum S. et S. 166.
Venetum Sacc. 128.
Xylostei (Pers.) Sacc. 162.

Anthostomella

appendiculosa (B. et Br.) Sacc. 174.

delitescens (De Not.) Sacc. 173.
intermedia Sacc. 127.
italica S. et S. 175.
limitata Sacc. 129.
nitidula Sacc. 131.
Olearum S. et S. 176.
phaeosticta (Berk.) Sacc. 874.
rostrispora (Ger.) Sacc. 177.
tomicoides Sacc. 130.
Tomicum (Lév.) Sacc. 373.
Unedonis (De Not.) Sacc. 175.

Apiospora

Punctum S. et S. 179.
Striola (Pass.) Sacc. 180.

Aposphaeria

conica Sacc. 1444.

Arthriniium

caricicolum K. et S. 766.

Arthrobotryum

(Arthrosporium) albicans Sacc. 10.
atrum B. et Br. 12.
— *majus 760.

camptosporum S. et S. 764.
stilboideum Ces. 11.

Ascochyta

bombycina P. et S. 1472.
Citri Penz. 1183.
Hesperidum Penz. 1184.
physalina Sacc. 88.

Ascomyces

aureus (Pers.) Magn. 1281.
?candicans Sacc. 1282.

Aspergillus

candidus Link. 704.
carneolus Sacc. 18.
clavatus Desm. 701.
fimetii S. et S. 703.
glaucus (Linn.) Link. *olivascens 702.
ochraceo-ruber Sacc. 17.
stereoreus Sacc. 19.
virens Link. 20.

Asterosporium

Hoffmanni Kunze 1102.

Attractium

Therryanum Sacc. 765.

B

Bactridium

flavum K. et S. 767.

Belonidium

Asteroma (Fuck.) Sacc. 1284.
auratum (Fuck.) Sacc. 1283.
basitrichum Sacc. 113.
pallens Sacc. 1286.
tephromelas (Pass.) Sacc. 1285.

Beltrania

rhombica Penz. 1204.

Bertia

italica S. et S. 336.
lichenicola De Not. 439.
macrospora Sacc. 136.
moriformis (Tode) De Not. 440.

Bispora

- monilioides Corda 22.
pusilla Sacc. 21.

Blennoria

- Buxi Fr. 1002.

Blitridium

- hiascens (B. et C.) Sacc. 1237.

Bombardia

- fasciculata Fr. 477.

Bostrichonema

- alpestre Ces. 763.

Botryosphaeria

- advena Ces. et De Not. 434.
Bérangeriana De Not., typica 430.
— *acutior 431.
— *gregaria 432.
— *melanomoides 433.
(Physalosp.) Corni Sacc. 182.

Botrytis

- Bassiana Bals. *tenella 692.
candidula Sacc. 700.
carnea Schum. 688.
cinerea Pers. 699.
*sclerotiofila (Klotzsh.) 699.
coccotricha Sacc. 694.
epigaea Link v. rosea 689.
fulva Link. 696.
gemella (Bon.) Sacc. 698.
geniculata Corda 690.
granuliformis Sacc. 691.
griseola Sacc. 23.
phymatotricha Sacc. 24.
pilulifera Sacc. 695.
reptans Bon. 697.
vulgaris Pers. Fr. 693.
— *plebeja Fres. 1192.

Bulgaria

- inquinans (Pers.) Fr. 1288.

C**Caldesiella**

- italica Sacc. 125.

Calloria

- coccinella (Somm.) Fr. 1289.
inflata (Karst.) Sacc. 1290.
leucostigmoides Sacc. 119.
luteo-rubella (Nyl.) Karst. 1291.
rubicunda S. et S. 1292.
succinella Sacc. 1293.

Calonectria

- Bloxami (B. et Br.) Sacc. 196.
macrospora S. et S. 197.
Massariae (Pass.) Sacc. 193.
minusecula S. et S. 194.
ochraceo-pallida B. et Br. 195.
varians Sacc. 154.

Calosphaeria

- affinis Nits. 475.
ciliatula (Fr.) Karst. 424.
dryina (Curr.) Nits. 477.
minima Tul. 478.

- Princeps Tul. 476.
taediosa Sacc. 479.
tumidula Sacc. 474.

Calycium

- parietinum Nyl. 1294.

Camarosporium

- (Vide quoque Hendersoniam).
incrustans Sacc. 1482.
Mori Sacc. 1483.

Caryospora

- callicarpa (Curr.) Nits. 202.
Lichenopsis (Mass.) Sacc. 203.
Olearum (Cast.) Sacc. 201.
Putaminum (Schw.) De Not. 204.

Cenangium

- Cerasi Fr. 1309.
(Chilang.) corylinum Sacc. 1303.
(Chilang.) Ligustri (Tul.) Fuck. 1304.

- Pinastri Tul. 1307.

- β. macrosporum Sacc. 1308.
(Chilang.) populinum Fuck. 1305.
Populorum Sacc. 1310.
strobilinum Sacc. 1306.

Cephalosporium

- Acremonium Corda 706.
— *majus Penz. 1191.
curtipes Sacc. 707.
macrocarpum (Corda) Sacc. 705.

Ceratium

- hydroides A. et S. 753.

Ceratostoma

- caulicolum Fuck. *eulmicolum Sacc. 186.
graphioides Sacc. 183.
Jani-collinum S. et S. 184.
Notarisii Sacc. 185.
Venetum Speg. 628.

Ceratostomella

- cirrosa (Pers.) Sacc. 345.
vestita Sacc. 344.

Cercospora

- althaeina Sacc. 652.
Apii Eres. 667.
Armoraciae Sacc. 646.
Asparagi Sacc. 70.
Bellyneckii (West.) Sacc. 649.
beticola Sacc. 669.
Calendulae Sacc. 654.
cana Sacc. 68.
Capparisidis Sacc. 653.
Carliniae Sacc. 647.
cerasella Sacc. 663.
Cheiranthi Sacc. 660.
Chenopodii Fres. 680.
circumscissa Sacc. 659.
Cistacearum Sacc. 670.
cladosporioides Sacc. 672.
crassa Sacc. 69.
eruenta Sacc. 686.
depazeoides (Desm.) Sacc. 645.
Diodiae Cooke 684.

- ferruginea Fuck. 655.
fulvescens Sacc. 66.
fumosa Penz. 1205. (nunc Penzigi Sacc.).

- fusco-virens Sacc. 687.
Galegae Sacc. 661.
helvola Sacc. 677.
Lythri (West.) Niessl. 668.
Majanthemi Fuck. 676.
Malvarum Sacc. 682.
Mercurialis Pass. 673.
— *fruticicola 674.
microsora Sacc. 622.
montana (Speg.) Sacc. 968.
Nasturtii Pass. 648.
nebulosa Sacc. 650.
neriella Sacc. 678.
olivaceans Sacc. 664.
persica Sacc. 67.
Plantaginis Sacc. 666.
punctiformis S. et R. 685.
Rhamni Fuck. 657.
rosicola Pass. 665.
Rösleri (Catt.) Sacc. 675.
Rubi Sacc. 658.
smilacina Sacc. 681.
sordida Sacc. 683.
tinea Sacc. 656.
Viola Sacc. 651.
Vitis (Lév.) Sacc. 671.

Cercosporella

- cana Sacc. 68.
pantoleuca Sacc. 679.
persica Sacc. 67.

Ceromyces

- terrestris Schulz. 107.

Ceriospora

- Dubyi Niessl. 187.
xantha Sacc. 188.

Cesatiella

- australis S. et S. 198.

Ceuthospora

- phacidioides Grev. 1170.

Chaetomella

- atra Fuck. 100.

Chaetomium

- stercorum Speg. 622.

Chaetopsis

- (Mesobotrys) fusca-Corda 26.
(Mesobotrys) macroclada Sacc. 25.
stachyobola Corda 27.

Chaetosphaeria

- fusca Fuck. 197.
parvula Sacc. 190.

Chaetostroma

- atrum Sacc. 752.
hysterioides Sacc. 751.

Chalara

- Ampullula Sacc. 33.
brachyspora Sacc. 35.
fungorum Sacc. 29.
fusidioides Corda. 24.

heterospora Sacc. 31.
 Montellia Sacc. 32.
 strobilina Sacc. 30.

Chromosporium

FUNGI ITALICI

AUTOGRAPHICE DELINEATI

A PROFESSORE

P. A. SACCARDO

Quisque fasciculus constat e 10 foliis, ut specimen, continentibus 40 tabulas coloratas, ejusque prima ital. Lib. (Frâncs) 4. Cum tab. nigris ital. Lib. 3. Quotannis saltem fasciculi quatuor prodibunt.

Nei vari anni, dacchè coltivo gli studi micologici, ho avuto la cura, per mio studio, di copiare dal vero quasi tutte le forme di miceti, che mi si presentavano all'osservazione. Ne nacque una collezione di figure colorate, sia dell'insieme che dell'analisi microscopica, di oltre 2000 specie e forme di funghi italiani, ben molte delle quali nuove affatto; collezione che vo di giorno in giorno accrescendo, chè, come ognun sa, siamo ancora ben lontani dall'aver tutta mietuta la enorme messe micologica.

Reputando che la pubblicazione delle ricordate figure possa in qualche modo giovare all'avanzamento della scienza ed agevolare lo studio ai cultori della micologia, io avrei desiderato che tali figure avessero potuto uscire quanto fedelmente naturali nella forma, altrettanto perfette nell'esecuzione artistica. Ma mi sono note le difficoltà d'ordine economico ed esecutivo che attraversano simili pubblicazioni e mi sono note le sin premature di opere analoghe e in Italia e fuori. Debbo dunque limitarmi a delle modestie autografie condotte da me stesso e colorate o meno secondo il desiderio dei scrittori. Dal lato artistico queste tavole lasceranno molto a desiderare: spero tuttavia che raggiungeranno lo scopo, che per la scienza ha primaria importanza, quello cioè di divisare i caratteri più importanti e più idonei alla determinazione pronta e sicura dei generi e delle specie. (*)

Contemporaneamente farò uscire un « *Commentarium Mycologiae italicæ* » che dal sommo nostro antesignano P. A. MICHELI, intitolerò « *Michelia* », nel quale pubblicherò mano a mano diagnosi, osservazioni, elenchi od altro sui funghi italiani.

(*) Le dimensioni dei funghi e delle loro parti, ove non sia altrimenti indicato, sono espresse nelle tavole in micromillimetri (1 microm. = 1/1000 di millimetro). La prima cifra indicherà la lunghezza, la seconda (separata dalla prima con due virgole orizzontali) indicherà la larghezza o grandezza dell'oggetto.

Spero che i Botanici nazionali ed esteri vorranno accordare a queste nuove pubblicazioni quell'appoggio che benevolmente concessero alla mia *Mycotheca Veneta*, la quale, mercè di quello, ha potuto già toccare la sua undicesima Centuria.

PATTI D'ASSOCIAZIONE

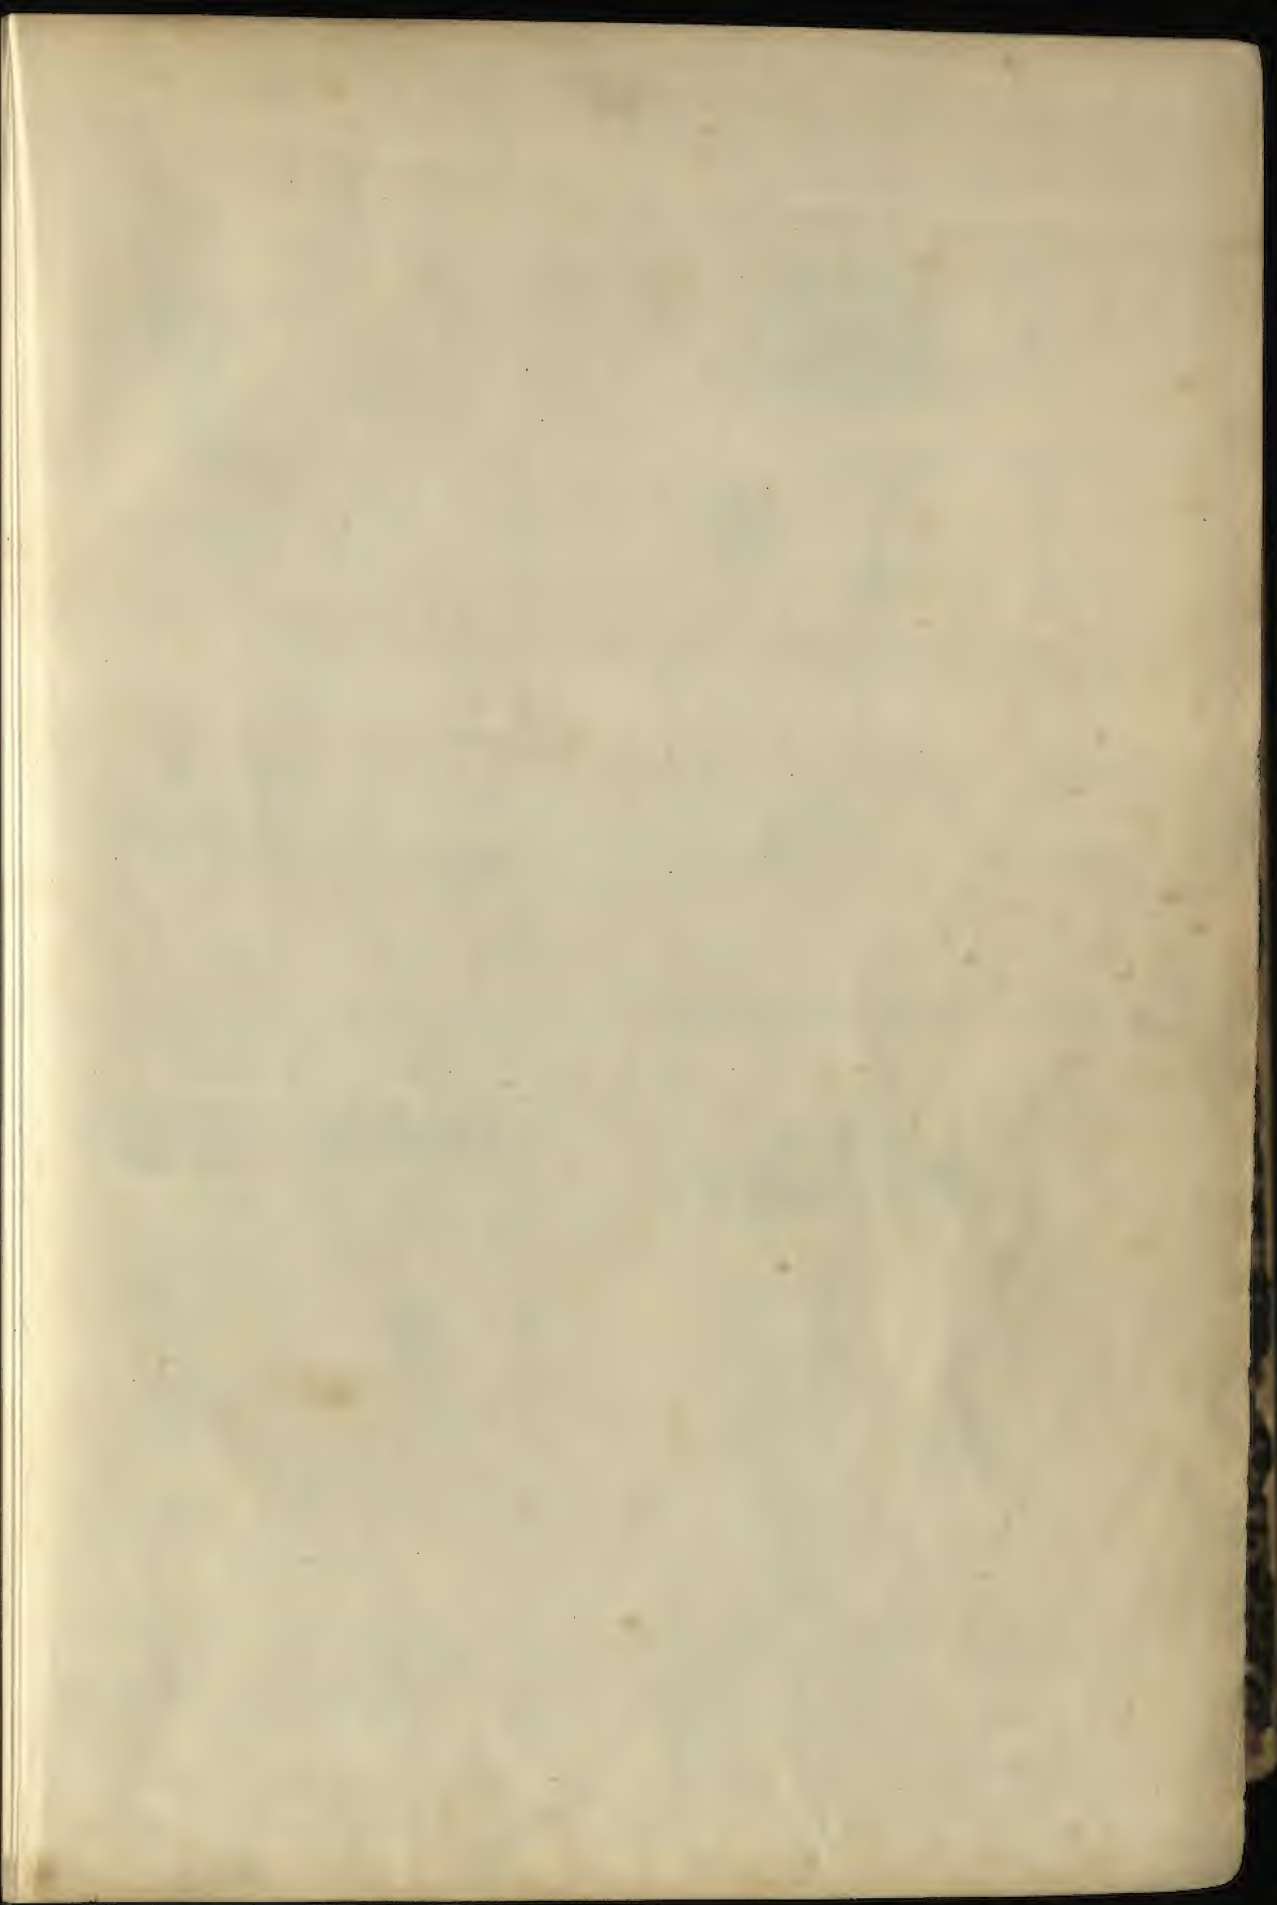

- 1.° L'opera « *Fungi italici autographice delineati* » uscirà in fascicoli di 10 fogli, come l'unico *specimen*, contenenti 40 tavole, le quali potranno dividersi e, con molta utilità degli studiosi, ordinarsi sistematicamente famiglia per famiglia, genere per genere.
- 2.° I generi o le specie nuove di funghi descritte dall'autore, che già ammontano ad oltre 300, saranno delineate fra le prime.
- 3.° Ogni fascicolo con tavole colorate costa, franco a domicilio, Lire italiane o Franchi 4, con tavole in nero L. it. 3.
- 4.° Ogni anno usciranno almeno 4 fascicoli, o ad intervalli o tutti uniti. Ad ogni invio di quattro fascicoli i sottoscrittori sono pregati di spedire direttamente all'autore l'importo dei fascicoli stessi.
- 5.° La pubblicazione « *Michelia, Commentarium Mycologicum italicum* » uscirà ad intervalli diversi, in fascicoli in 8.° gr. al prezzo di L. 1 per ogni foglio di stampa. Ogni fascicolo potrà stare anche da sè, separatamente.

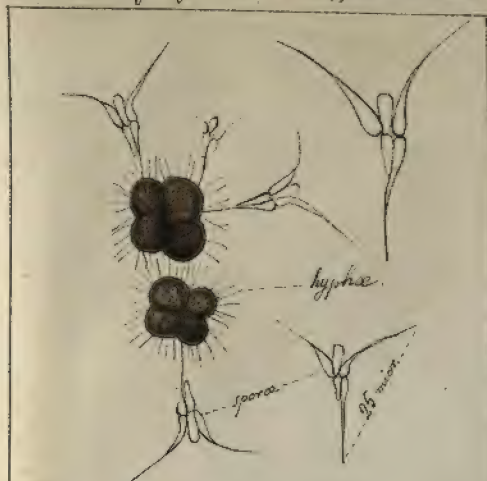

Nota. I sig. Botanici che intendono associarsi ai *Fungi italici* sono pregati di conservare l'unità tavola, che forma parte dell'opera: non associandosi, faranno cosa gradita rinviandola all'autore.

Padova, 10 Febbraio 1877.

Prof. P. A. SACCARDO.

(Inviare la scheda e rimetterla firmata all'Autore).

1. *Titea callispora* Sacc.

Sacc. F. Ital. (Penzig F. agrum.) Hymenom.

Agaricus Citri Inz. (Inzenga, Fung. Sicil.)
In radicibus putridis Citrorum,
in Sicilia, frequens.

1121

Junio 1882

Sacc. F. Ital. (Penzig F. agrum.) Hymenom.

Agaricus Hesperidum Brig. (Briganti,
Hist. Fung. Napolit.). —
ad pedem Citrorum, in agrumetis.
Italiae inferioris.

1122

Junio 1882

Sacc. F. Ital. (Penzig F. agrum.) Hymenom.

Schizophyllum commune Fr. — Penz.
Fung. Agrum. N. 3.
In truncis Citrorum, frequens.

1123

Junio 1882

Sacc. F. Ital. (Penzig F. agrum.) Hymenom.

Polyporus obliquus Fr., f. *stratosa*. —
Penz. Fung. Agrum. N. 4.
In truncis Citri Aurantii, rarior.
Carini (Sicilia), leg. V. Beltrani.

1124

Junio 1882

Sacc. F. Ital. (Penzig F. agrum.) Hymenom.

Dardalea unicolor Fr. — Penz. Fung.
Agrum. N° 5. —
In truncis Citri Aurantii et C. Limonum,
frequens.

1125

Junio 1882

Sacc. F. Ital. (Penzig F. agrum.) Hymenom.

Corticium cinereum Fr. — Penz.
Fung. Agrum. N° 6.
In ramis emortuis Citrorum;
Patavii. Feb. 1882.

1126

Junio 1882

Sacc. F. Ital. (Penzig F. agrum.) Hymenom.

Corticium nudum Fr. — Penz. Fung.
Agrum. N° 8.
In truncis ramisque Citri Aurantii,
haud frequens.

1127

Junio 1882

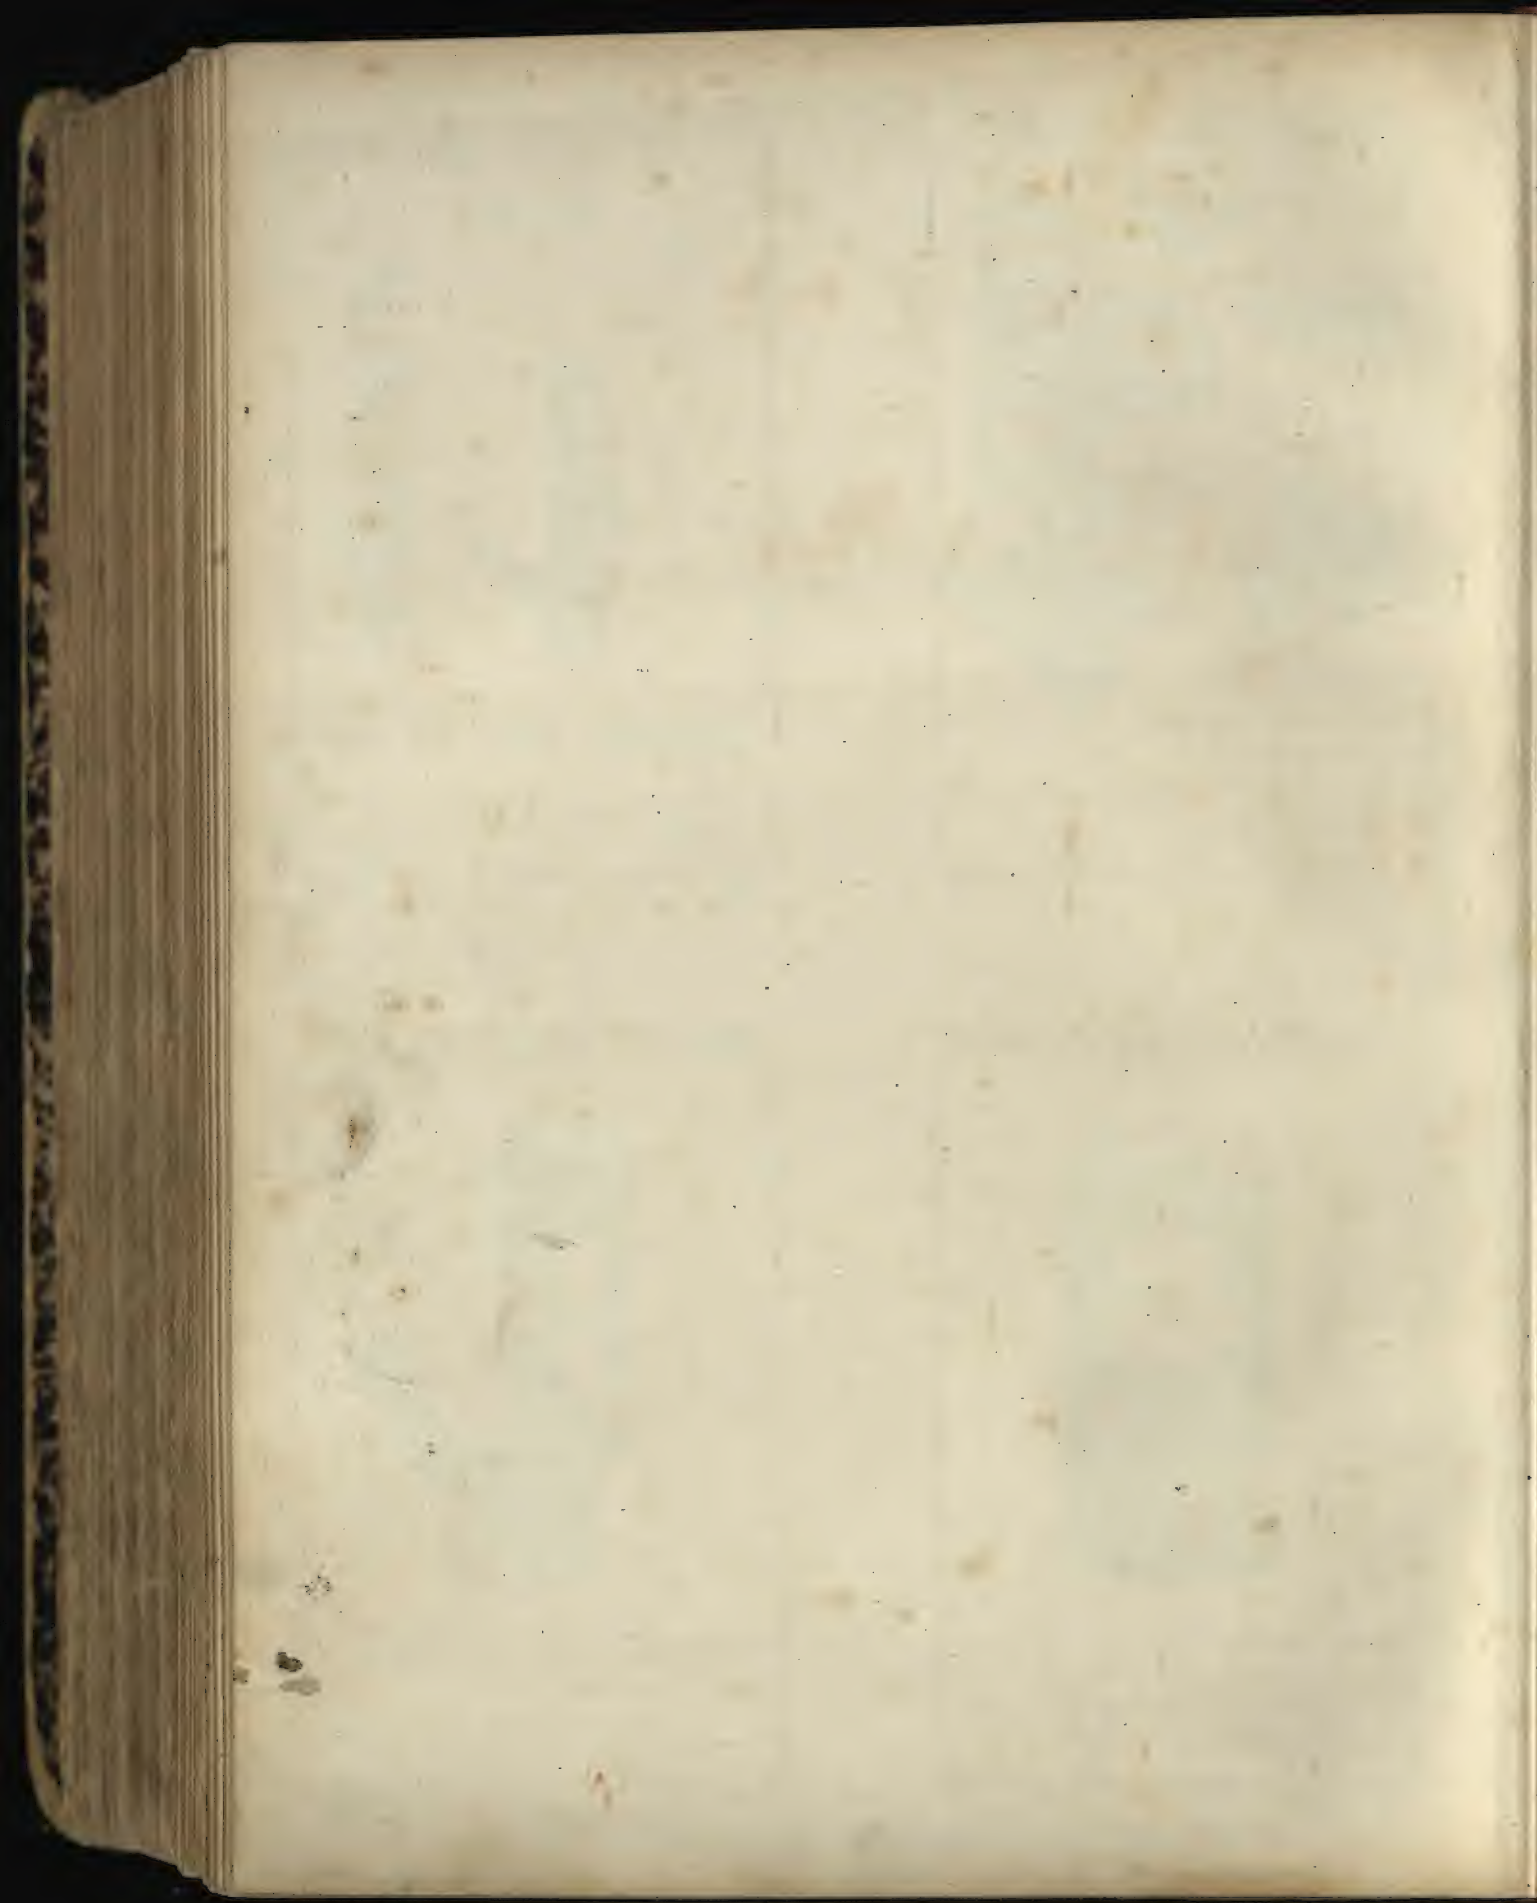

Sacc. F. Ital. (Penzig F. agrum.) Hymenom.

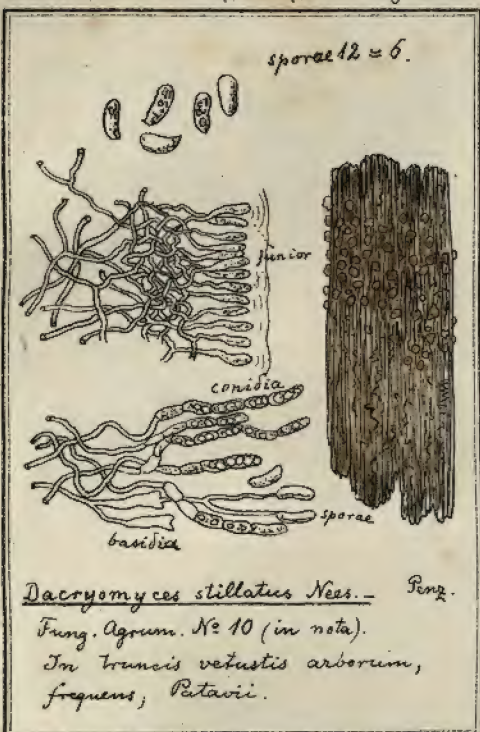

Merulius Corium Fr., f. Citri. —
Penz. Fung. Agrum. N° 9.
In ramis emortuis Citrorum, in Horto
Patavino.
